AIM: Web Security with SSL/TLS

Configure and implement secure web communication using SSL/TLS protocols, including certificate management and secure session establishment.

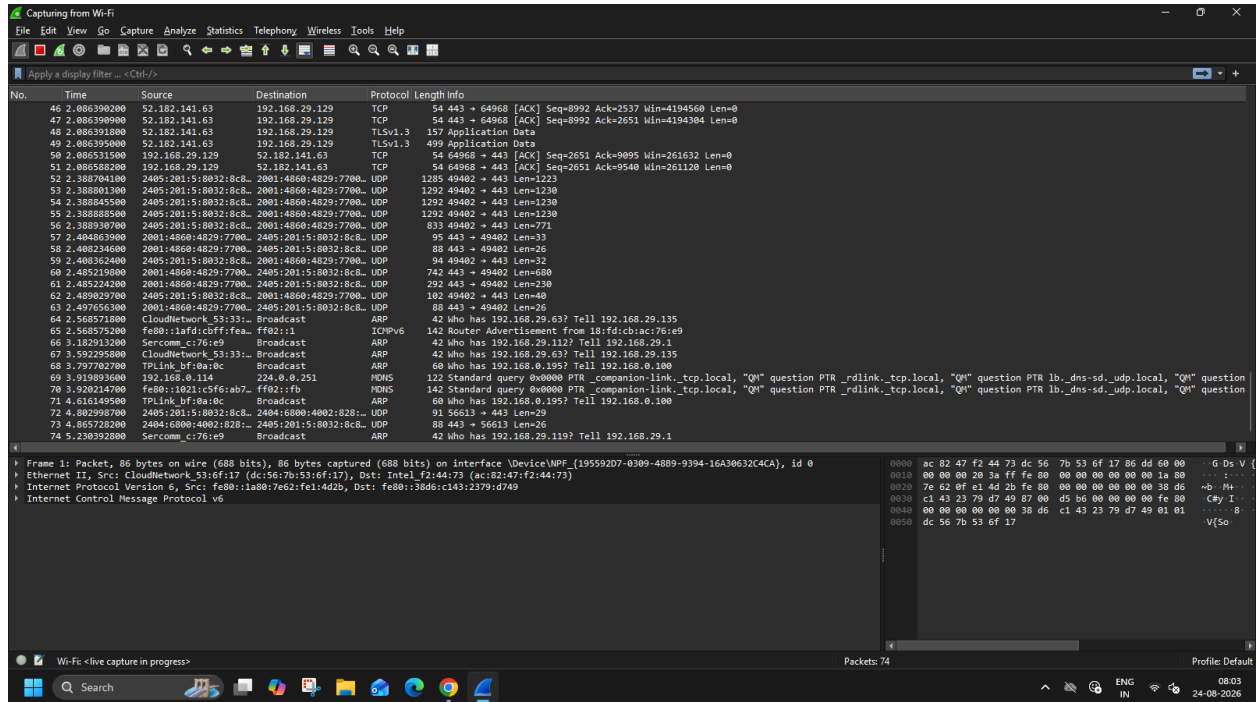

Step 1: Open Wireshark

- a. Open Wireshark.
- b. You will see network interfaces such as:
Wi-Fi

SHETH L.U.J AND SIR M.V. COLLEGE OF ARTS SCIENCE AND COMMERCE

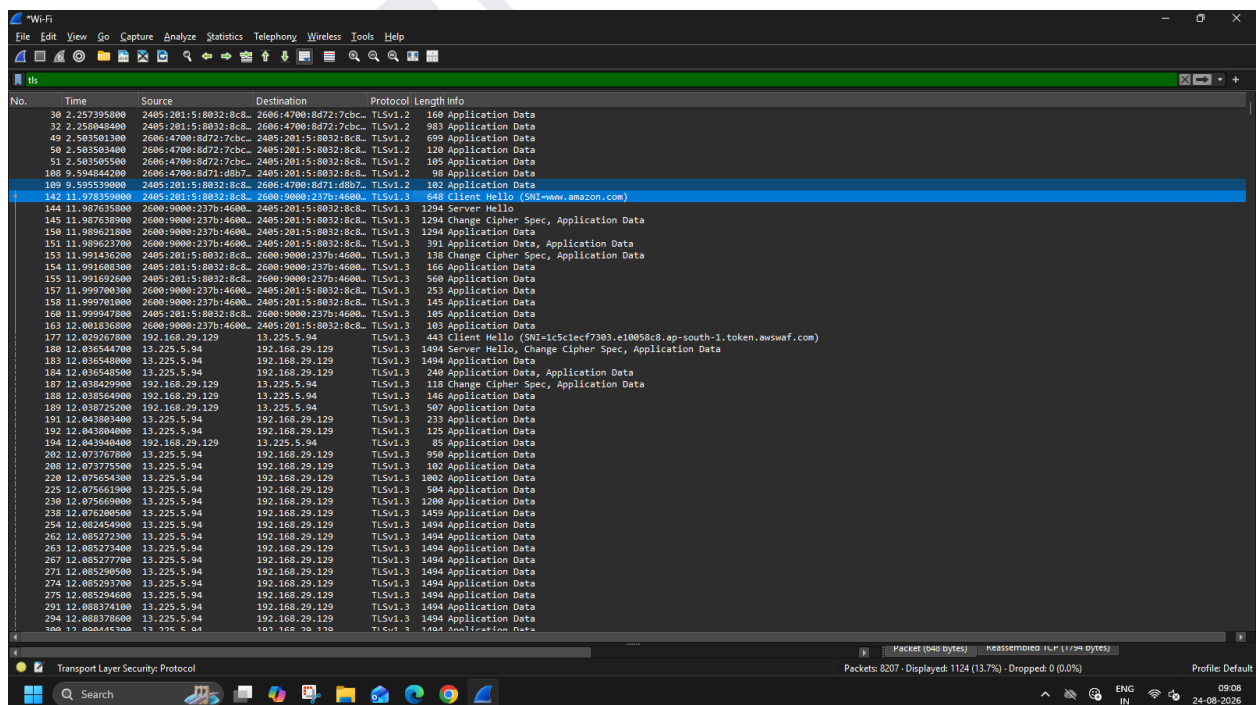

SUBJECT: CYBER & INFORMATION SECURITY

Step 2: Generate HTTPS Traffic

1. While Wireshark is capturing:
2. Open Chrome/Firefox.
3. Visit: www.amazon.com

Client Hello:
